

# ORION® PINLESS WOOD MOISTURE METERS:

Engineered for Fast, Accurate, Non-Damaging Moisture Measurement

## ALL ORION METERS FEATURE

- Industry-leading 7-year warranty
- On-demand calibrator
- Relative measurement mode to measure other materials, such as drywall

### ORION 910 DEEP DEPTH PINLESS WOOD MOISTURE METER

Provides  $\frac{3}{4}$ " moisture content measurements

### ORION 930 DUAL DEPTH PINLESS WOOD MOISTURE METER

Provides both  $\frac{1}{4}$ " and  $\frac{3}{4}$ " moisture content measurements

### ORION 950 SMART PINLESS WOOD MOISTURE METER

Dual-depth smart pinless meter is Bluetooth-enabled for easy digital reporting with smart apps, plus it calculates your jobsite's EMC (equilibrium moisture content) using the built-in temperature and humidity sensor.

### FLOORSMART™ AND WOODSHOP MC APPS

Designed for use with the Orion 950. These apps enable you to quickly collect your wood moisture data on your smart device, set specifications for separate jobs and wood materials, and much more.

## C555 CONCRETE MOISTURE METER

Calibrated specifically for concrete, the C555 provides a useful first step for evaluating a concrete slab that will receive some type of flooring finish.

The C555 is the only concrete moisture meter on the market that allows for in-field calibration.

Plus, the C555 is the perfect targeting device for strategically choosing where to place your Rapid RH® Smart Sensors when conducting in-situ relative humidity (RH) testing of concrete moisture.

## SMART LOGGER V2

The data logging device that monitors your job site's ambient temperature and humidity conditions, providing continuous monitoring even while you're away. Pair it with the Wagner Sentry app to check the status of conditions, email reports, and keep eyes on your job site 24/7.

Download the Wagner Sentry app:

## FLOOR SENTRY®

An easy-to-install embedded wood floor data logger that turns any wood floor into a smart floor. It alerts you through the Wagner Sentry app when in-floor and subfloor temperature and relative humidity conditions might lead to moisture-related damage. Floor Sentry gives you the tools to monitor your flooring and take action before serious damage occurs.
